

MUSIC CITY PRIMARY CARE

Danielle Fabry, MD | Internal Medicine

Genetic Screening

If you or a loved one have experienced early onset breast cancer (before age 45), male breast cancer, multiple family members with breast and prostate cancer, or early onset ovarian or pancreatic cancer- you qualify for genetic testing.

Genetic testing is covered by insurance and is a simple blood or saliva test that is *performed in our office!* If you test positive for a gene mutation, your family can be tested for free.

Fight the fight, find the cure

Every October, we have the chance to show our support for those affected by breast cancer. In fact, 1 in 8 women in the US will be diagnosed with breast cancer sometime in their lifetime. If you notice a change, please talk to your physician right away. Early detection means early treatment!
